Dassault Systèmes Partners with COFREX as a Silver Sponsor of the France Pavilion at Osaka 2025 Expo

Dassault Systèmes and COFREX, the French exhibition company responsible for the France Pavilion at the Expo 2025 Osaka, Kansai, Japan (Osaka 2025 Expo), have signed a partnership making Dassault Systèmes a silver sponsor of the France Pavilion, and a sponsor of the thematic fortnight.

Dassault Systèmes has created a virtual twin of the France Pavilion enabling immersive teleportation experiences in a collaborative VR space named Teleport 1/1. For this project, meetings in the Teleport 1/1 allowed people to experience the France Pavilion in an immersive collaborative environment at the same scale of the real France Pavilion by leveraging Dassault Systèmes' virtual twin technologies. COFREX unveiled the France Pavilion within Teleport 1/1 during the pavilion's official opening event in Paris in February 2025.

Dassault Systèmes drives virtual innovation in various industries including aerospace and defense, life sciences and healthcare, cities, and infrastructure, through its 3DEXPERIENCE platform and virtual twin technologies. In the aerospace and defense industry, it helps optimize satellite design and exploration missions. In the life science and healthcare industry, it contributes to the development of personalized medicine and new therapies. It also promotes sustainable urban design through the use of virtual twins for cities and infrastructure. Through collaboration with the software used in the virtual twin of the France Pavilion at Osaka 2025 Expo, it provides its customers with more advanced simulation environments.

Through this partnership, Dassault Systèmes will present a sustainable and innovative vision of future cities and industries. The company also aims to create a place where people can share next-generation experiences that fuse the virtual and the real, and explore the possibilities of the future. Dassault Systèmes will continue to contribute to solving societal issues through its technologies, and accelerate sustainable innovation.
